

Hub Switch for Next Generation ATCA Blade Platform

Diversified Technology, Inc. is providing a Hub Switch blade, **ATS1160**, based on the PICMG 3.0 Standard (AdvancedTCA) to a leader in Telecom Data Server Products. This Hub board (PICMG 3.1 Option 1) is a member of DTI's Targa Series of AdvancedTCA boards and systems. It provides support for high availability, separate control plane switching, data plane switching, and storage plane switching for AdvancedTCA shelves. The board provides the blade server with maximum performance allowing service providers the flexibility to deploy revenue-generating services that can easily adapt to the evolving marketplace needs.
