

Embedded Rackmount System

Providing a Cohesive Approach to Embedded Solutions

Diversified Technology's TrexSys-4 low profile (4U) chassis is designed for use with DTI's high performance PCI single board computers and high I/O bandwidth PCI bus add-in cards. Part of DTI's embedded rackmount chassis product family, the system provides exceptional capacity and expandability in a rack-efficient 4U, compact package ideal for applied computing applications. The modular design supports reliability and serviceability.

About DTI

Through a cohesive approach to embedded computing, Diversified Technology works hand-in-hand with your company to ensure that you are getting the best performance, the highest reliability, quickest time to market and the most efficient use of hardware for your embedded application.

4U Industrial Strength Rackmount System

Multiple Processor Board Options to Choose from that may be Customized to your Application Requirements

Supports 14-slot Backplanes

FDD, Three 5.25" bays, and One Internal 3.5" Hard Drive

Single 460W AC or Redundant 450W Power Supplies (PFC AC or -48VDC)

Parts and Labor covered for 2 Years
