

Application Note: 64-bit PCI in 32-bit backplanes

Date: 06/07/04

Caution:

Do not attempt to use a 64-bit PCI card with a 64-bit CPU board in AT powered DTI 32-bit backplanes. This may cause the system to become unstable. 64-bit PCI cards can be identified by the 1.5 inch extension present behind the 3 inch 32-bit PCI goldfingers.

Questions or comments on this Application Note should be sent to tech@dtims.com.
