

Certificate of RoHS Compliance

DTI Finished Goods Number: 912019362 Effective Date: 08 / 13 / 2008

Notes:

AMC10G-CX4

EC directive 2002/95/EC (**RoHS Directive**) restricts the use of the hazardous substances listed below in electrical and electronic equipment. Based on information provided by our suppliers DTI designates the product listed below as **RoHS compliant** for orders placed on or after the date of this certificate.

RoHS compliant means that:

- DTI's supplier has confirmed the compliance status of the relevant products to DTI.
- DTI applies rigorous and ongoing processes to confirm and document this.
- DTI performs material content testing where appropriate.
- DTI has introduced new part numbers for all new compliant products to identify and segregate compliant stock.

Confirmation of compliance status by DTI's suppliers is either because the products do not contain any of the restricted substances referred in Article 4(1) of the RoHS Directive at concentrations in excess of those permitted under the RoHS Directive or because removal of the restricted substances is not technically possible and their existence in the products at levels in excess of these concentrations is allowed as one of the particular applications listed in the Annex to the RoHS Directive.

For these purposes, the maximum concentration values of the restricted substances by weight in homogenous materials are:

Lead 0.1%

Mercury 0.1%

Hexavalent Chromium 0.1%

Polybrominated Biphenyls 0.1%

Polybrominated Diphenyl Ethers 0.1%

Cadmium 0.01%

DTI takes all reasonable steps to confirm suppliers' statements regarding the absence of the restricted substances and maintains a full audit trail of relevant documentation to support this.

All information provided in this Certificate of Compliance is accurate, to the best of DTI's knowledge, as of the date this certification was issued.
